

# TECC-LEO

*Focus on tactical movement, casualty drags, and scene management.*

Streamlined Training:  
Practice "working with what you have" rather than relying on a fully stocked ambulance or advanced ALS gear.

Tactical Understanding:  
Learn the specific movement formations and "Direct Threat" priorities that police are taught

Realistic Capability Testing:  
This customized and expanded course will provide the necessary tactical "stress inoculation"

## **TECC LEO / First Response — EMS & Law Enforcement (Enhanced)**

**Train Together. Respond Smarter. Save Faster.**

**Elevate care at the point of threat.**

This unique advanced 16-hour TECC program integrates **Police, Fire, and EMS** into one high-performance response team — where medical and tactical precision meet operational coordination.

### **Course Overview**

A dynamic, **evidence-based program** that builds upon the basic 8-hour LEO class.

#### **Day 1:**

- Core TECC principles,
- hands-on medical skill building
- threat-informed care

#### **Day 2:**

- Realistic warm-zone scenarios with role players,
- Communication, decision-making, and movement in warm-zone environments.

**Completion:** Post-course exam, credentialing, and measurable readiness outcomes.

---

### **Why This Course Matters**

#### **For Law Enforcement (PD):**

- **First-on-scene lifesaving:** Apply tourniquets, wound packing, chest seals, and airway basics immediately — without compromising officer safety.
- **Care Under Fire:** Make rapid, threat-informed medical decisions while maintaining scene control.
- **Reduce liability & fatalities:** Early, coordinated intervention saves lives and reduces organizational exposure.

#### **For EMS Providers:**

- **Rapid Triage:** Learn rapid triaging in the warm zone and removal of patients to CCP's.
- **Faster time-to-care:** Arriving patients are already stabilized, improving outcomes.
- **Joint safety operations:** Build muscle memory through realistic, side-by-side RTF (Rescue Task Force) exercises.

## For Joint Operations:

- **Shared Playbook:** Unified TECC algorithms, language, and objectives minimize confusion and delay.
  - **Trust Through Reps:** Realistic, stress-based scenarios using inert weapons, live role players, and bleeding simulators.
  - **Proven Outcomes:** Faster interventions, improved communication, and stronger interagency readiness.
- 

## Who Should Attend

- Patrol officers, supervisors, SROs, tactical and special units
  - EMTs, paramedics, and first responders operating near or within the threat zone
  - Fire and rescue personnel involved in Rescue Task Force deployment operating into warm zone along with counterparts EMTs paramedics and police
- 

## Course Format

**Total Duration:** 16 hours (recommended over 2 consecutive days)

- **Day 1:** Interactive lecture + advanced skills labs
  - **Day 2:** Scenario-based, decision-rich simulations with role players
- 

## Core Skill Sets Covered

- Hemorrhage control: tourniquets, hemostatics, wound packing
  - Chest seals, airway management, and hypothermia prevention
  - Tactical casualty assessment under stress
  - Care Under Fire, casualty movement & evacuation
  - CCP setup, radio communication, and EMS handoff
- 

## Simulation & Equipment

- High-fidelity bleeding simulators (Techline)
  - Inert training weapons with wireless shot indicators
  - Role-player driven scenes replicating complex, evolving threats
- 

## Credentials Awarded

- TECC-LEO Provider Wallet Card (valid 4 years)

- Certificate of Completion
- CAPCE credit available (as applicable)

---

### Host Requirements

- Classroom or training space (A/V optional)
- Scenario training area with restrooms/hydration station
- Up to **30 participants** per class
- Flying Aces Enterprises & Consulting provides all medical training gear and simulation equipment

---

### Course Outcomes

- Earlier lifesaving care at the point of threat
- Stronger LE ↔ EMS coordination
- Reduced time-to-transport and on-scene confusion
- Greater confidence, readiness, and public trust

### Ready to Elevate Your Team's Readiness?

**Bring the intensity and realism of the field into your training room.**

Partner with **Flying Aces Enterprises & Consulting** — experts with decades of NYPD, FDNY, and tactical medicine experience who have lived the events most only train for.
