

Emergency Medical Technician

Hybrid Course

Description: The Emergency Medical Technician course is designed to provide training to prepare an individual to function independently in a medical emergency. This course provides the basic knowledge and skills needed to provide basic life support (BLS) care and is required to progress to more advanced levels of pre-hospital patient care. Healthcare Provider level CPR is required prior to attending this course. A CPR course option has been scheduled for February 11th (6p-10p) for an additional fee.

Overview: This is a Hybrid course meaning the didactic portion of the class must be completed through an online learning system with the practical labs being conducted in person. The course outline is included below.

Course Fee: \$325 includes the required course materials and testing fee.

Location: Franklin County Public Safety Training Center, 1516 Franklin St, Rocky Mount, VA 24151
